

YUUV JAUHARI

Software Engineer • NLP & Machine Learning

Dublin, Ireland • jauhariyuuv@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFILE

Integrated MSc Computer Science graduate of Trinity College Dublin (2026). Published at COLM 2025. Industry experience across NLP pipelines, clinical ML, legal-tech, and applied research. Comfortable taking projects from prototype to production.

EXPERIENCE

NLP Data Scientist — Quantexa

Jan 2025 – Sep 2025

Dublin, Ireland

- Upgraded the open-source News Signals library from v7.2 to v8.2, extending pipeline functionality and developer experience.
- Awarded Q4 Innovation title for a financial use-case demo built on the News API.
- Co-authored a research paper on multi-agent negotiation simulations, accepted at COLM 2025.
- Built and fine-tuned sparse ML models and LLMs for financial signal extraction; led feature engineering for the pipeline.

Back End Developer — Fathom

Jan 2024 – Apr 2024

Dublin, Ireland • TCD Software Engineering Industry Programme

- Built Cloud Builder, a CLI tool that deploys and manages cloud infrastructure in seconds with a handful of lines of config, vs. minutes for incumbent tools.
- Project selected for the Software Engineering Industry Awards; codebase later licensed and open-sourced.

Analyst — Oracle

May 2024 – Aug 2024

United States (Remote)/Gurgaon, India

- Queried and maintained Essbase multidimensional databases supporting corporate reporting workflows.
- Built and optimised internal Apex applications; implemented a JavaScript-based organisational chart tool used across the team.
- Performed data analysis in Excel to support corporate planning initiatives.

Software Engineer Intern — BlastAsia Inc.

Jun 2023 – Sep 2023

Philippines (Remote)

- Trained an ML model to generate Figma UI code from proprietary design datasets.
- Integrated the ChatGPT API into a client-facing production product.
- Built an internal ML service with a custom API communication layer to improve inference accuracy.

AI Software Developer — Propylon

Jan 2023 – Apr 2023

Dublin, Ireland • TCD Software Engineering Industry Programme

- Built a text classification model trained over 1,000+ US legal documents, integrated end-to-end into an ETL pipeline.
- Stacked the classifier with a linear regression model to predict whether a US state legal bill would pass, achieving 65%+ accuracy.
- Migrated the baseline algorithm to XGBoost, raising prediction accuracy from 45% to 65%+.
- Serialised trained models with pickle to enable offline loading and reduce inference latency.

Research Intern — Delhi University

Jun 2022 – Sep 2022

Under Prof. Shobha Bagai • Chess Simulations & Decision Trees

- Built a configurable Java GUI chess engine with an upscalable board for simulation experiments.
- Implemented a modified chess variant with a rudimentary decision-based opponent to study move-probability distributions across decision trees.

PUBLICATIONS

Stable Contexts, Mixed Feelings: Rethinking Emoji Sentiment — Preprint

May 2026

Submitted to ICWSM 2027

- Built a per-emoji stability metric from sentence embeddings of 16,575 tweets; showed that emojis in topically coherent contexts carry more polarised sentiment, not less : decoupling topical coherence from affective consistency as independent dimensions of emoji meaning.

Master's Thesis: ICU Hypotension Early Warning System — TCD

Apr 2026

Submitted to Trinity College Dublin • MIMIC-IV v3.1

- Built an hourly hypotension early warning system on 94,259 ICU stays from MIMIC-IV v3.1, reaching AUROC 0.945.
- Diagnosed and fixed a deployment failure where globally calibrated alarm thresholds produced zero recall during MAP-absent hours (53% of patient-hours); proposed subset-calibrated dual thresholds, recovering 93.75% recall at 10% alarm burden.

NegotiationGym: Self-Optimising Agents in a Multi-Agent Social Simulation — COLM 2025

Oct 2025

- Framework for simulating and optimising negotiation strategies between AI agents using feedback-driven learning. Accepted and highlighted at COLM 2025. arxiv.org/abs/2510.04368

EDUCATION

Integrated MSc & BA(Mod.) Computer Science — Trinity College Dublin

Sep 2021 – May 2026

- On track for overall First Class Honours. Five-year integrated honours programme combining undergraduate and master's degrees.

High School Diploma — Science Stream — The Mother's International School, Delhi

2021

- 95% in Class XII Board Exams; 93% in Class X.

LEADERSHIP & ACTIVITIES

- Chairperson, Trinity College Dublin Network Society (DU Netsoc) — Sep 2022 to Jan 2023; previously Events Officer (2021–2022).
- Competitions Officer, Trinity College Dublin Computer Science Society — Sep 2022 to Dec 2022.

SKILLS

Languages: Python, JavaScript, Java, SQL, C++

AI / ML: LLM fine-tuning (LoRA), HuggingFace, PyTorch, scikit-learn, XGBoost, LSTMs, SHAP, sparse models

LLM / Agents: Multi-agent systems, agentic patterns, RAG, ChatGPT / OpenAI API integration, sentence embeddings, vector representations

Engineering: ETL pipelines, REST APIs, Docker, Git, Node.js, Jupyter, LaTeX
